Make Your Business

More Secure | More Intelligent | More Mobile

World's data has quadrupled in the last five years, thanks to video

Video is empowering the way in which ideas are communicated, problems are solved and businesses are run in today's world.

2.7 zettabytes of data exist in the universe today, two-thirds of which is in the form of video and audio. 600 exabytes of data cross the internet every year, and more than half of that is video. Data production will be 44 times greater in 2020 than it was in 2009, most of which will again be video. Yet, most big data applications today do not use video data.

Poor data or analytics is estimated to cost businesses 20-35% of their operating revenue.

The need for making sense out of humongous amount of data, especially video has become critical, more than ever before.

Intelligence at your finger tips

2020 Imaging has developed an innovative technology platform that enables businesses to take proactive actions by changing the way data is analyzed and visualized.

Visualize - Insightfully
Video data streams

Analyze - Predictively
Actionable information

Act - Proactively
Business impact

Be it Homeland Security, Integrated Townships, Commercial Buildings, Retail, Hospitality, Healthcare, Banking, Data Centers, Industries, Energy or Infrastructure - the collaborative 2020Touch platform will interact with multiple data sources and will help you manage your "Internet of Things".

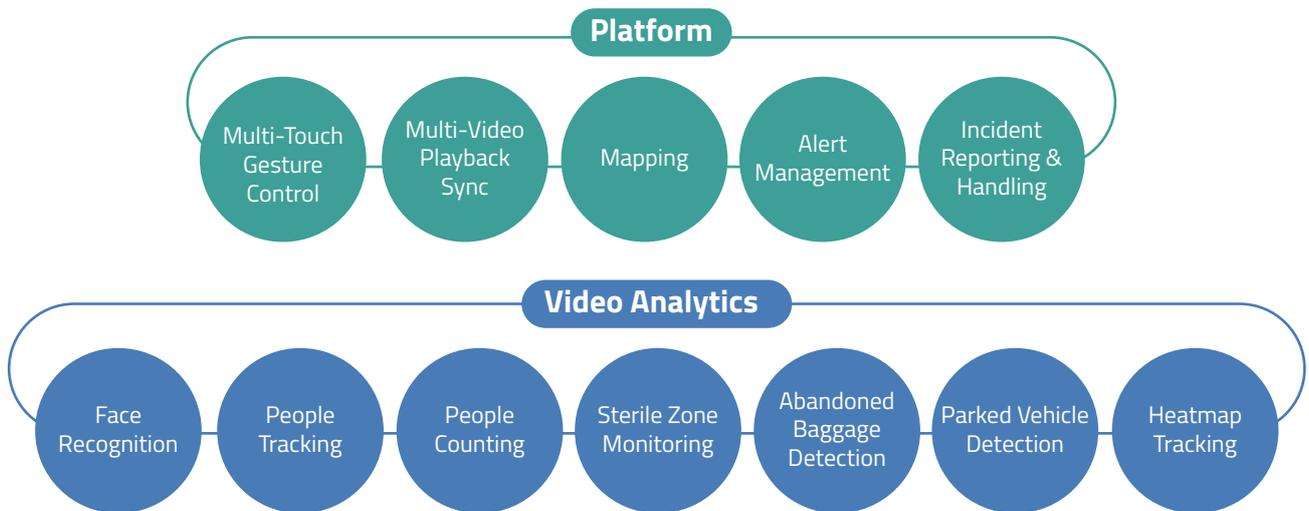

Vision

To be a trusted provider of a ubiquitous technology platform for data visualization

Mission

- To build and scale a simplified platform for heterogeneous data visualization and analytics
- To provide innovative applications for collaboration that make data visualization intuitive, powerful, fast and effective
- To create a global ecosystem of business and technology partners
- Ethical business practices & best processes to enhance stakeholders value

The Power of the Platform

Why 2020 Imaging?

We have invested over 50 man-years in R&D over the last 3 years to get you a state-of-the-art platform that enables:

- Enhanced experience in data discovery and interaction
- Integrated time, space and location analytics
- Critical decision making with quick response times

A common operative picture to bring you predictive capability

A self-serviceable technology that is leading edge and future-proof

Scalable, modular and open architecture for seamless integration

Our Recognitions

Some of our Testimonials

“ Led by a revolutionary new user interface, the system off-loads tasks from the operators - reducing staff levels while making event response easier and more reliable ”

“ 2020 Imaging is a company that can rapidly react to demands from clients ”

602, Omega House, Technology Street, Hiranandani Gardens, Powai, Mumbai - 400 076, India.
